SermonAI — keys for the service

Every key works with no text box selected. If a box has the cursor, click anywhere empty first.

Card — a verse the app heard → **Staged** — you read it once more → **Live** — on the projector

EVERY SERVICE

`Enter`	The next step. Nothing staged: stage the top card. Something staged: send it live.
`Shift` + `Enter`	Top card straight to the projector.
`Esc`	Clear the staged verse. The projector keeps what it has.
`→` `←`	Next or previous verse of the passage on the projector.

FINDING A VERSE

`Ctrl` + `K`	Search any verse. Type **john 3 16**. `Enter` stages it, `Shift` + `Enter` sends it live, `Tab` changes translation, `Esc` closes.
`P`	Pin the top card. Pinned verses stay all service, at the top of the list.
`1` … `9`	Send pinned verse 1 to 9 to the projector, any time, as often as needed.

IF SOMETHING IS WRONG

`B`	**Blank the projector at once.** Press `B` again to bring the verse back. Nothing is lost.
`Esc`	Wrong verse staged? Clear it. It never reached the screen.

Before the service: Live tab → choose the input → switch **Transcribe** on. Cards appear on the right as scripture is spoken; a card nobody touches leaves after 30 seconds. **Auto-live off** means nothing reaches the projector without you.
